DETAILED ACTION

Allowable Subject Matter

Claims 52-56,58,72,73 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 57 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 112

Claims 57,69,80 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is no proper antecedent basis for 'the disc' in claim 57 and 'the screw blade' in claim 69. Claim 80 is indefinite because it depends on a cancelled claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 50,51,59-61,74-76,78,79 are rejected under 35 U.S.C. 102(b) as being anticipated by the German '059 patent (German). German shows a crushing device

including a crushing mechanism inside of a perforated drum. Note that the material being treated does not further limit an apparatus claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 62-71,77,80 are rejected under 35 U.S.C. 103(a) as being unpatentable over German. The limitations of these claims would have been obvious modifications by one skilled in the art once the basic apparatus was known. For example, using replaceable screen sections would have been obvious to reduce maintenance costs. Also, using a barrier within the drum would have been obvious to ensure the desired material is removed from the drum before the material is crushed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
